Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Steffensen in view of Finch.

Steffensen discloses a method of treating water for suspended solids including confined exposure to a living colony of the pennywort aquatic plant (entire document). Steffensen does not explicitly disclose using *Hydrocotyle ranunculoides*.

In any case, Finch discloses a method of treating water wherein *Hydrocotyle ranunculoides* (page 31) is desirable, for example, in removing nutrients and suspended solids from water (entire document).

Accordingly, it would have been readily obvious for the skilled artisan to have modified the method of Steffensen such that it includes using the aquatic plant *Hydrocotyle ranunculoides* in order to, for example, remove nutrients from and diminish suspended solids in water, as suggested by Finch.

It is noted that applicant has used the phrase "consisting of" in the claim. In the absence of an explicit declaration by applicant of what elements are excluded by use of said phrase, it is the examiner's position that none of the elements disclosed in the method of Steffensen are excluded.

**Conclusion**
